

2004 Commercial Pesticide Applicator Recertification Programs

September 6, 2004

The following programs are available for recertification training for commercial pesticide applicators. Additional programs will be listed on the web site given above when they are received by KDA. Applicators whose certification expires in 2004 may meet the traditional recertification training requirements by attending a complete program that has been approved by KDA or they may accumulate credit hours. Applicators whose certification expires in 2005 or 2006 need to meet the new recertification credit hour requirements and accumulate the appropriate number of credit hours per category or subcategory. Please call KDA if you have any questions on these new requirements.

Be sure to attend approved training and send in your KDA renewal application & fees to KDA by December 31st of the year your certification expires or you will have to retest to become certified in the following year. Program sponsors charge attendance fees which do not include the recertification renewal fee of \$50 per category that is paid to the Kansas Department of Agriculture.

Bring your certification number - *It is your responsibility to verify training date, location and space available with the listed sponsors.*
